Note: Dates shown reflect the date when enrollments in these sections first appeared in the Banner system.

**Methodology:** This report reflect added sections on or after December 14, 2020 when the first low-enrolled cancelled section occurred. Enrollments in the added sections were retrieved from Student.Course.Reg.Audit (ODS data set). To determine whether students were still enrolled by census day, the very first and last registration dates/codes for each student in each added section was examined. The last registration dates/codes that indicated students are still registered by census were used in this report.

<sup>1</sup> De Anza College cancelled 109 sections due to low enrollments. Of these sections, 94 had at least one enrollment and a total of 502 unduplicated students were dropped. By census day, 452 remained enrolled, and 151 re-enrolled in the course they were dropped from but in a different section.
