

Career Technical Education (CTE) Internship Announcement

Company: InfoSec

Wage: \$14

Location: Sunnyvale

Overview:

Start your career with us today and make a big impact on healthcare! Our college recruiting program is the gateway for your entry into the exciting world of **Information Security** by enabling you to put your academic training and passion to work for a global company whose products impact healthcare every day.

Our **InfoSec department** is busy ensuring that our company's information remains safe and secure from unauthorized access, alteration or deletion. Our devices allow doctors to diagnose a multitude of illnesses in environments ranging from state of the art labs to huts in the third world, and we need your help in keeping our technology safe.

During this InfoSec Internship, you will have the opportunity to solve evolving real-world InfoSec challenges regularly, and work side by side with experienced staff; gaining rich, varied experience faster than you would at most companies.

Responsibilities:

- Analyze firewall data daily, and extract anomalous data for reporting
- Install, test, document, and implement Dell two-factor authentication
- Assist in building, configuring, documenting VMware environment for Windows servers (AD, Exchange, SQL, and data)

Qualifications:

- Pursuing a Bachelor's degree in Information technology or Computer Science, or other related Business/Technical discipline.
- Excellent writing, communication, and organizational skills.
- Microsoft Windows servers and Office applications proficiency

Preferred Qualifications:

- Information Security (Firewalls, Antivirus, Intrusion Prevention)
- Windows or Linux Operating Systems
- Scripting in Perl or PowerShell

How to Apply:
