

## Career Technical Education (CTE) Job Announcement

**Company:** Stack Labs

**Job Title:** Software Internship (paid)

**Location:** Cupertino, CA

### Company Description

Stack Labs is a rapidly growing startup in Cupertino that was started in 2013. We are taking lighting from being connected to being actually intelligent and responsive. Our lights adjust to their environment automatically, enhance daily comfort and well-being, eliminate complexity, and increase energy savings by up to 50% compared to a regular LED bulb. More importantly Stack's embedded sensors provide non-invasive home awareness and spatial intelligence in any building, and will revolutionize the value consumers see from IoT products and platforms.

### Position Description

The Software Intern will have the opportunity to learn the process and activities associated with the test function inside a consumer hardware technology company.

- Implementing our Internal Support site website
- Assisting with QA for Mobile applications and Backend APIs
- Researching and improving the integration our internal development tools

As your experience grows you will have the opportunity to provide input on ways to improve the test procedure to reduce time and or increase accuracy.

This position will be based in our hardware lab near Cupertino, CA, with flexible hours between 8am and 6pm, Monday-Friday.

Qualified individuals should be excited about working with our Software team and have entry level familiarity with Linux operating systems.

### How to Apply

Please email resumes to Nicole Hughett at [nhughett@stacklighting.com](mailto:nhughett@stacklighting.com)

If you need assistance creating a resume please contact the Career Development Coordinator, Ashley Phillips, at [phillipsashley@fhda.edu](mailto:phillipsashley@fhda.edu) or (408)864-5717.
