

# Community Garden

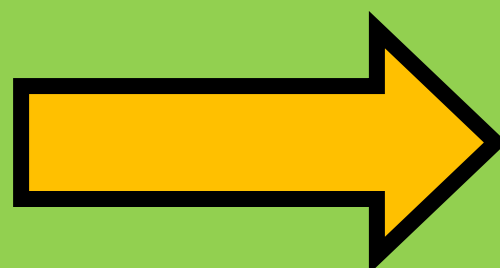

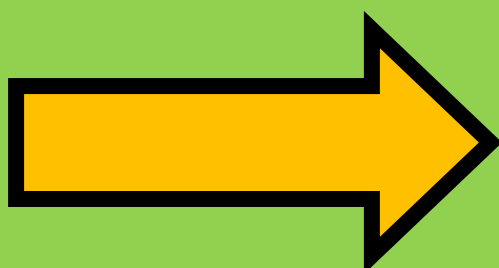

Did you know that food services have been growing veggies on campus for use in the cafeteria?

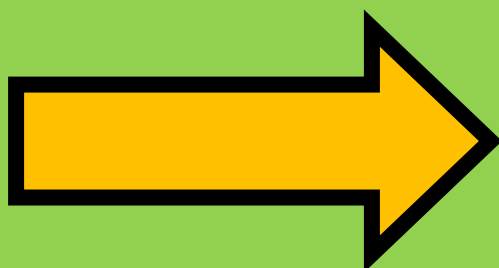

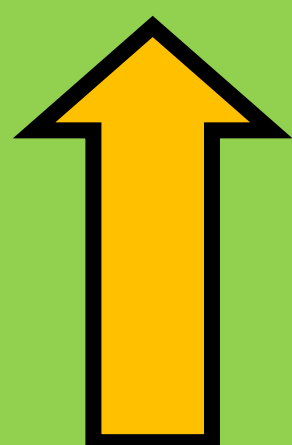

De Anza Food Services  
& Kirsch partnership  
2017-18

From our community garden to school's kitchen! The De Anza dinning services and the Kirsch collaboration has taken a huge step towards sustainable and organic farming. Students help with harvesting fresh chives, basil, and peppers and delivering them to the kitchen!

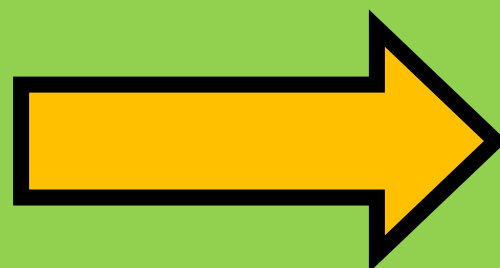

Students in ES 2  
(Humans, Sustainability,  
and the Environment)  
harvesting basil and  
chives

We are closing the loop on  
campus!  
If you are interested in these  
types of activates check out  
ES 2!

We trimmed the  
flowers to dry and  
collect the seeds.

Now we want to share  
them,  
with you! Plant your  
own !
