

Auto 94B Lab Final Schedule
Fall 2015

This performance evaluation will consist of 3 stations, each having a task with a 20-minute time limit. These tasks include, but are not limited to, catalog usage, measuring for clearance, and fastener identification.

Each student will be given an instruction/answer sheet for each station. Limited verbal instructions will be given during this final. Record all results on these sheets and turn them in after completed. *Coveralls and safety glasses are required.* Each group will start promptly at the given time, and no make up will be allowed. Parking availability may be different for those starting later in the morning, so plan ahead. If you arrive early, please wait in the main lab area

Tuesday, December 8

8:00-9:00
