

Nursing 84L

Objectives of Observation Days

After each observation day, the student will be able to:

1. Describe the role of the nurse in the observation setting.
 - a. If the observation is with another health care team member, you will be able to describe their role and how this member interacts with the nurse in the provision of patient care.
2. Describe how care in the observation setting for the geriatric patient differs from that of a younger adult.

You will give a brief report in postconference of your experience and observation of the role of the nurse/health team member in your observation setting.
