**General Instructions:** For extra credit (the maximum you can earn for the class is 10 points) you will create a mind map (concept map/hierarchy) for theories or concepts you find difficult. You may earn 5 points for each mind map you create. You will need to include functions/examples when appropriate. For those of you unfamiliar with mind maps, please check out this link: [http://en.wikipedia.org/wiki/Mind_map](http://en.wikipedia.org/wiki/Mind_map). This is a rare instance in which I’m asking you to use Wikipedia! Be sure to include your name (Last, First). The use of different colors, pictures and creativity in general are encouraged. Each mind map is due by the day of the exam, in which the theory/concept is covered. Check the syllabus schedule to see what chapters those theories/concepts are covered in to make sure you meet the deadline.
