**Tourette Syndrome Homework**

**Directions:** Go to this website: http://www.dana.org/news/brainhealth/detail.aspx?id=9890

After reading the article answer the questions below. Please just simply write the answers. No explanation is needed. You may write your answers on this sheet.

1. Name two behavioral problems that Tourette’s syndrome (TS) is associated with.

2. A French neurologist first described the disorder in 1885. He noticed patients shared one feature. State that feature.

3. The perception of TS began to change in the 1960s, when doctors recognized that people with the symptoms benefited from what types of drugs?

4. What is the cause of TS?

5. Name three common motor tics.
