

Lecture Access for Pediatrics

The lectures for Pediatrics are all on a site called 3C Media. The link for the lectures is:

<http://www.3cm mediasolutions.org/f/a5901e93bb419b19421935fc898544143c3f65ae>

You should download the lectures to your computer. (Don't wait until the night before the class in case there is a problem with the system!) Make sure you watch the lectures BEFORE you come to class. I do NOT re-lecture that material and you will be lost if you do not see the lecture first. Some weeks have 2 lectures to cover all the material!

There are Power Point handouts that go along with the lectures, and they are on my website. Most students find it easiest to follow the lecture if they print off the handouts before watching the video, and then just take a few notes to refresh their memories or jot down the details. I will warn you that the lecturer speaks quickly, so having the handouts really is a help in getting all the material down.

Please note that there are 2 *extra* sets of handouts for Power Point slides that I use in class. They are linked as Lecture 1 Classroom Handout and Lecture 4 Classroom Handout. Please print these off before you come to the lectures to facilitate note taking.
