## HTEC 101B-01

### Skill Building for HTEC 90G

### Fall 2014

**Prerequisites:** HTEC 60A (may be taken concurrently) **Course I.D:** Credit/No Credit (1 Unit)

**Days/Times:** Basic Patient Care students will practice blood pressures, temperatures, pulses, respirations at least 3 hours per week as indicated by the vital signs sheet they have to hand in each week. They will practice positioning, hand washing, chief complaints, role playing, and audiometry, vision testing, Ht & Wt on Adults and babies. Each student will practice 15 sets of vitals each week for ten weeks.

---

**Instructor:** Maureen Miramontes RN **Phone:** 408-864-8789

**Course Description:** Development of speed and accuracy in the skills taught in Basic Patient Care courses.

**Expected Outcome:**

- (1) To improve the level of competency learned in Clinical Techniques.
- (2) To review and maintain the level of competency achieved once the level is satisfactory.
- (3) To improve the speed with which the skills are carried out.

**Texts:** *Clinical Procedures for Medical Assistants*, Bonewit-West, W.B. Saunders 8<sup>th</sup> Edition textbook and study guide.

**Evaluation:** Evaluation will be based on the degree of improvement made during the quarter, on class participation and on regular attendance. Erratic and/or insufficient attendance will result in an unsatisfactory grade in this course.

**Attendance:** Please notify the instructor prior to all absences. Arriving to the lab late twice in the quarter will result into an absence. Only two absences will be accepted.
