Exam questions will be designed so as to allow you to show that you have kept up with course readings. I strongly encourage you to *use the actual readings and class discussions* as your primary study tools. They are more reliable than sources like the Wikipedia, and will be more relevant to the questions you'll see on the exam.

I also encourage you to visit the [website for the Cahn book](#) where you can find flashcards and sample multiple choice questions based on our readings. These are excellent resources, and can serve to supplement your understanding of the readings.
