Subject: Concurrently Enrolled Students-Fall 2012

The National Student Clearing House (NSCH) provided a report on concurrent enrollment in fall 2012. De Anza College submits enrollment data to NSCH as part of a federal requirement for financial aid and we use their services to track student transfers.

NSCH defines concurrent enrollment as a situation in which a student is enrolled at two or more schools and the enrollment overlaps within at least 30 days. The tables below highlight their main findings.

Table 1. De Anza Students Concurrently Enrolled at Another Institution – Fall 2012

Total Enrolled	Total Concurrent Students	% of Concurrent Students
21,130	1,841	9%

Note: The NSCH report of enrolled students is lower than our fall census number of 23,599; see methodology for detail on who is not included in the enrollment report to the NSCH.

- 9% of students enrolled at De Anza in fall 2012 were also enrolled at another higher education institution.

Table 2. Segment of Concurrent Enrollment

Concurrent School Sector	Students
Two-Year Public	1,612
Two-Year Private For-Profit	3
Four-Year Public	337
Four-Year Private Non-Profit	66
Four-Year Private For-Profit	13
Total	2,013

Includes students concurrently enrolled at multiple institutions.

- 80% of De Anza students concurrently enrolled at another college are enrolled at a Two-Year Public college and 17% are enrolled at a Four-Year Public college.
- Less than 1% of De Anza students concurrently enrolled at another college are enrolled at a For-Profit institution.

Table 3. Top 10 Concurrent Enrollment Institutions

Concurrent School	Full-Time	Part-Time	Total
Foothill	78	687	765
San Jose State	98	128	226
West Valley	19	175	194
Mission College	18	126	144
San Jose City College	18	114	132
Ohlone	5	71	76
Evergreen Valley	13	61	74
San Francisco State	16	16	32
Chabot	3	19	22
East Bay	8	11	19

Note: Full and part-time enrollment at De Anza.

- Foothill College enrolls the highest number of our concurrently enrolled students, 41% of total concurrent students.
- San Jose State enrolls the highest number of De Anza full-time students who are concurrently enrolled at both colleges.

Methodology:

The financial aid office reports student enrollment to NSCH three times per quarter, at census, mid-quarter and after the quarter ends.

Only students with a valid social security number are included. Therefore, international students and non residents are not included. Students who did not enter their SSN or entered an invalid SSN on their admissions application are not reported to the Clearinghouse.

Apprenticeship students are not reported to the Clearinghouse.

Since the report was published prior to the end of our fall term, it is assumed that the NSCH report is based on our fall census enrollment report.
