Subject: Fall 2010 Student Data from MSTRC and ATC

A data file of students who checked into the ATC or MSTRC in fall 2010 was provided to the De Anza College Office of Institutional Research and Planning. This resulted in 1,922 students identified as tutored students. These students were compared to all other students enrolled in fall 2010, excluding the tutored students. Success rates, ethnicity, and gender distribution of students who received tutoring services were compared to all other students in fall 2010.

Highlights include:

- Students who received tutoring services at one of the two centers had higher success rates (83%) than students who did not receive tutoring services (73%) in the same quarter.
- Students who received tutoring services had grade point averages in the range of 3.1 to 4.0 at a higher rate than students who did not receive tutoring services.
- Students identifying as Asian (47%), access tutoring services at the highest rate, followed by Unknown (16%), White (12%) and Latino (10%).
- The gender distribution of students that receive tutoring services is 55% female and 45% male.
