

**Summer to Spring Persistence of COUN100 Students
De Anza College, Summer 2004 and Spring 2005**

Group	Summer 2004 Cohort	Enrolled Spring 2005	% of Cohort Enrolled in Spring 2005	Number of Cohort Not Enrolled in Spring 2005
COUN100.	2,176	1,722	79%	454
COUN100X	70	59	84%	11

Notes: Using T Test at .05 alpha -- no statistically significant difference in the summer to spring persistence between the two groups.

Does not consider Winter 2005 enrollment.

Only students with a P in COUN100(X) are considered in the cohort.

These results are consistent with the figures for 2003M and 2004S.
