WAT Portfolio Pilot Spring 2004 Report

De Anza Research **Draft**, November 30, 2004

Methodology

Spring 2004 grades for EWRT100B and EWRT160 were compared for students participating in pilot portfolio ("Portfolio Students") sections, with students not involved with portfolios ("Not in Pilot"). There were 5 EWRT100B sections with Portfolio Students and 14 sections Not in Pilot. The 34 sections of EWRT160 in spring 2004 included both Portfolio Students and students Not in Pilot. LART100.2D was not included because there was no concurrent enrollment in the lab LART170. The EWRT100B sections participating in the spring 2004 pilot were as follows:

EWRT100B04D – Shively, EWRT100B15D - Shively EWRT100B09 – Quigley, EWRT100B10 – Helfman, EWRT100B13 – Chow.

There appear to be some minor differences between the two groups of students in terms of gender, educational goal, and start term. The graphs listed under Sample Statistics on the next page indicate that the Portfolio Students as a group had a higher percentage of male students, were more oriented towards transfer or obtaining a degree, and tended to have started at De Anza in the previous summer of fall. Since the cell sizes are small, the differences may not be relevant from a policy perspective; similar statistics for fall 2004 data will be reviewed to determine if the differences in demographics hold with a larger portfolio group.

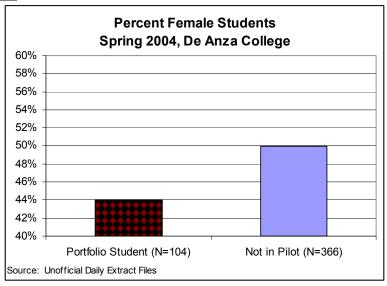

The following sections are participating in fall 2004:

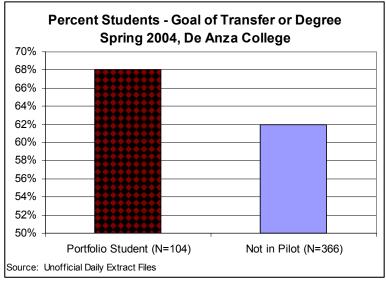

EWRT100B03, EWRT100B06, EWRT100B10, EWRT100B12, EWRT100B13, EWRT100B14, EWRT100B20, EWRT100B21, EWRT100B22, LART100.02D, LART100.03D.

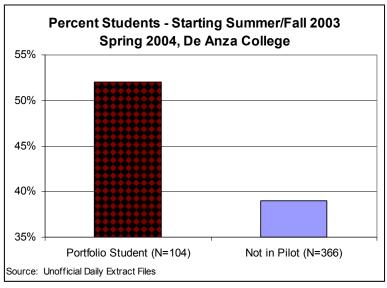

Observations (see graphs on page marked Course Grades)

- ➤ For both groups of students, the pass rate is higher in EWRT100B than in EWRT160.
- > 77% of the Portfolio Students passed EWRT100B, compared with 69% for students Not in Pilot.
- ➤ 68% of Portfolio Students passed EWRT160, compared with 64% for students Not in Pilot.
- ➤ Both groups had similar rates for students receiving a W grade, ranging from 12-15% of total grades.
