- Transfers to CSU campuses has seen a three-year trend in decreased transfers, between 2010-11 and 2011-12 CSU transfers decreased by 5% and continued to fall by 9% from 2011-12 to 2012-13. This is a direct result of changes to the San Jose University's admissions procedures. SJSU declared all majors "impacted" in 2011-12 and now ranks

applicants by GPA, resulting in students competing for available spots within each impacted major. SJSU also eliminated its local service area preference. Specifically, 778 students transferred to SJSU in 2012-13 compared to 984 in 2010-11.

- However, the highest number of transfers in 2012-13 were still to San Jose (64% of all transfers), followed by San Francisco (14%) and East Bay (9%).
