

SLO Assessment Cycle for AUTO 57A**Career Research and Employment in the Automotive Industry**

Assessment Initiated by: [Dave Capitolo](#) (8312) in AUTO

Outcome 1: Statement

After studying the various parts of the automotive industry and learning job interview skills, the student will participate in an 'in-class' job interview.

Assessment Cycle Records:

Outcome 1: Assessment Planning Modified: [05/27/2010]

Assessment Strategy Used:

Quarter: Fall 2009

Assessors: Dave Capitolo

Assessment Tools: Interviews

Sections being assessed: 01F

Outcome 1: Reflect & Enhance Modified: [05/21/2010]

Number of people involved in Reflection and Enhancement: 2

Changes:**Methods:**

Each student was required to participate in a job interview in front of his/her peers. The evaluation was based on the group's comments and their decision to pick a candidate to hire. Each student was assessed on appearance, speaking ability, completeness of answers. Only six students were able to get perfect marks based on the evaluation.

Summary:

I realized that the biggest hurdles in this exercise are nerves and speaking abilities.

Enhancement (Part I):

Next year I plan on having more opportunities for speaking exercises. After doing more shorter mock interviews, the students may be better prepared for the final interview.

Enhancement (Part II):
