

## SLO Assessment Cycle for NURS 84L

*Medical/Surgical II (Care of the Older Adult) - Clinical*

Assessment Initiated by: [Catherine Hrycyk](#) (5529) in NURS

### Outcomes:

#### Outcome 1: Statement

Apply age-related changes and developmental tasks to formulate a plan of care for an older adult.

### Assessment Cycle Records:

#### Outcome 1: Assessment Planning Modified: [02/04/2011]

##### Assessment Strategy Used:

Quarter: Spring 2010

Assessors: , Sherri Cozzens

Assessment Tools: *No tools assigned.*

Sections being assessed: 01, 02

#### Outcome 1: Reflect & Enhance Modified: [02/04/2011]

**Number of people involved in Reflection and Enhancement:** 2

##### Changes:

Changed the evaluation rubric to encourage a fully developed assessment.

##### Methods:

Rubric for the Nursing Care Plan.

##### Summary:

Most students performed well in this area and met the objective. However, some students turned in Nursing Care Plans without including thorough psychosocial assessment data and plan of care.

##### Enhancement (Part I):

I spend more time in post-conferences reviewing how to perform and complete psychosocial assessment on the geriatric population.

I will expand my teaching content in this area, to include more specific and concrete examples.

##### Enhancement (Part II):

#### Outcome 2: Statement

Analyzes comprehensive assessment data to identify real problems and predict and minimize potential problems.

#### Outcome 2: Assessment Planning Modified: [02/04/2011]

##### Assessment Strategy Used:

Quarter: Spring 2010

Assessors: , Sherri Cozzens

Assessment Tools: *No tools assigned.*

Sections being assessed: 01, 02

#### Outcome 2: Reflect & Enhance Modified: [02/04/2011]

**Number of people involved in Reflection and Enhancement:** 2

##### Changes:

Syllabus materials were changed to include different/ better examples of patient problems and situations and subsequent assessments and care planning of real and potential problems.

##### Methods:

Rubric for Critical Thinking Worksheet and Nursing Care Plan

##### Summary:

Most students were able to be successful.

Some students needed to redo aspects of or the complete Nursing Care Plan and Critical Thinking Worksheet in order to improve to meet the objective.

**Enhancement (Part I):**

As part of clinical supervision and evaluation, students will be asked more frequently to critically think about pathophysiology, disease processes and laboratory data and how all of the above affect patients.

**Enhancement (Part II):**

A simulation assistant would be beneficial. They would help present clinical nursing problems in the lab setting, fostering critical thinking in simulated nursing situations without the stress of actual patient care responses. Critical thinking is a skills that needs practice.
