

SLO Assessment Cycle for AUTO 64

Automotive Machining and Engine Repair

Assessment Initiated by: [Dave Capitolo](#) (8312) in AUTO

Outcomes:

Outcome 1: Statement

Student should be able to answer selected questions on the final concerning engine theory, valve events, engine diagnostics, and engine assembly.

Assessment Cycle Records:

Outcome 1: Assessment Planning Modified: [01/12/2011]

Assessment Strategy Used:

Quarter: Fall 2010

Assessors: Dave Capitolo

Assessment Tools: Exams

Sections being assessed: 61

Outcome 1: Reflect & Enhance Modified: [04/12/2011]

Number of people involved in Reflection and Enhancement: 2

Changes:

Methods:

Check these selected questions and determine what percentage of the class answered them correctly.

Summary:

Only about 70% of the students answered the selected questions correctly. I learned that the students that we have in the evening classes are quite different than the ones we have in the morning program. Many of the evening students did not even purchase the required textbook.

Enhancement (Part I):

Over the summer I plan on changing the way the material is presented and doing more demonstrations. Many of these evening students learn more when information is presented in a live demonstration.

Enhancement (Part II):

My time over the summer.
