Additional Notes:

Outcomes:

Outcome 1 Phase I: Statement

Demonstrate the anatomy, physiology and diseases of the cardiovascular, respiratory, blood, lymphatic, musculoskeletal and endocrine systems.

Outcome 1 Phase II: Assessment Strategy Used:

Assessment Quarter: Fall 2010

Assessors:

Assessment Tools: •

Sections being assessed: 01

Outcome 1 Phase III: Reflect & Enhance

Number of people involved in Phase III: 7

Changes:

Methods:

Embedded test and assignment questions.

Findings and Conclusions:

Seventy-five percent of these students should achieve at least 76% on these questions. They did meet this expectation with a mean score of 87%

Enhancement (Planned Actions)**Part I:**

We plan to introduce a hybrid course which will allow students to remediate aspects of needed further comprehension. This may bring the assessment to a higher level.

Part II:

Outcome 2 Phase I: Statement

Develop case studies that concern diagnostic conditions and diseases of systems and/or medical specialities.

Outcome 2 Phase II: Assessment Strategy Used:

Assessment Quarter: Fall 2011

Assessors:

Assessment Tools: • Design scenarios that relate to the disease process.

Sections being assessed: 01

Outcome 2 Phase III: Reflect & Enhance

Number of people involved in Phase III: 7

Changes:

Methods:

Embedded test and assignment questions.

Findings and Conclusions:

Seventy-five percent of these students should achieve at least 76% on these questions. The mean score was 87%. They did meet this expectation.

Enhancement (Planned Actions)**Part I:**

We plan to change this course to a hybrid which would include many scenarios to help students better identify aspects needing further comprehension. This would bring the assessment to a higher level.

Part II:

No additional resources are required to maintain this level of achievement.
