FOR ALL MAJORS

Check <u>assist.org</u> for transferrable classes from De Anza College to the institution(s) you intend to apply for admission. This link http://web1.assist.org/web-assist/DAC.html will take you directly to De Anza College courses applicable for transfer, then select a campus and major from the drop down menu to see what courses articulate. Check http://www.deanza.edu/math/pdf/mathsequence.pdf for the sequence of De Anza math courses and their prerequisites.

STEPS FOR REASSESSING

- 1. Create an account for the ALEKS math module using the De Anza discounted website.
 - a. From the discounted website: http://shop.mheducation.com/mhshop/productDetails?isbn=007783996X purchase for \$45 the 11-week access code. Upon check out, select "Digital Access Code" for an instant email of the code, instead of the "Access Card" that would be physically mailed to your address.
 - b. Go to <u>aleks.com</u> then click "<u>SIGNUP NOW!</u>" as seen in the yellow rectangle below or use the live "<u>SIGNUP NOW!</u>" link.

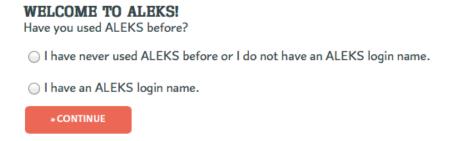

c. Enter the Prealgebra course code: **RW6QY-G6REW** into the windows as seen in the screen shot.

d. Click "Continue."

e. Select whether you have an existing ALEKS account and click continue.

f. Enter the access code that you received in your email, after you completed your purchase from step "a."

2. Complete the ALEKS initial diagnostic/assessment *without using any resource other than your memory*—do not use any textbooks, the internet, notes, tutors, friends or any other resource. Keep in mind that if you do not know something, you should click the "I don't know" button--it's okay! The program uses your strengths to teach you new concepts, so it will make completing your work difficult if you use outside resources. Once you complete the initial assessment a customized study plan will be created to meet your needs.

- 3. You must complete at minimum 75% of the module to earn reassessment. *If you complete beyond the minimum your chances of achieving your goal drastically increase!*
- 4. Upon completion email Melissa Aguilar at aguilarmelissa@deanza.edu and alert her that you have completed the minimum requirement for the module. Please include your student ID number in the message.
- 5. Once verified, you will be CC'ed on an email authorizing your reassessment at the Assessment Center.
- 6. Schedule your appointment for reassessment—complete your re-assessment within the week of completing the module to ensure that you achieve the highest score possible. Take your time on your reassessment and check your answers!

The ALEKS prealgebra module is a full program review of Math 210. If you test out of Math 210 you will be able to enroll in Math 212. Expect to spend from 60-80 hours to complete the module. Successful students worked on the module weekly and spent more than 2 hours per login. You can save a lot of time and money by testing our of 210!

Click HERE for the De Anza Math Course Sequence Link!

Please email aguilarmelissa@deanza.edu if you have any questions or concerns.

Note: Because you finish the minimum percentage requirement, it does not mean that you automatically earn placement in that course, you must reassess and earn your placement. Again, if you complete more than the minimum you will increase your chances of your desired goal of higher placement!
