Course Description:  

Meteorology 10 is a survey course, which provides students with an overview of the principals of the science of meteorology and climatology. Major themes include the origin, evolution and structure of Earth's atmosphere; a study of the major atmospheric variables that determine weather; and an examination of the objectives techniques used by meteorologists to forecast the weather. The course will also present an overview of climate science including the systems used to classify climate.  

Lecture sessions will incorporate appropriate audiovisual materials and live Internet access to major meteorological databases to explore significant national weather events that occur during the quarter.  

Evaluation:  

A student's final grade will be based upon four (4), fifty (50) questions each, objective-type exams including a comprehensive final examination. The lowest of the first three test scores will be dropped and the final grade will be a simple average of the remaining two (2) exams and the final exam. Sample exams from previous quarters are posted online.  

The best way to prepare for an examination is to review the Chapter Study Questions and the practice tests that are provided on the course web site.  

Make-up examinations will not be administered.  

- A missed test – for any reason - will be counted as the student’s one allowed dropped test. There will be no exceptions.  
- Students missing two tests must withdraw before the final withdrawal date or receive an “F” grade for the class.
o Last day to drop a class with no record of grade is Sun Apr 19
o Last day to drop with a "W" is Fri May 29

Extra Credit:
- Extra credit questions will be provided on each examination and will be drawn from material in instructional videos presented during class.
- Extra credit assignments and projects will be also be offered during the quarter.
- All extra credit is optional.

Notes regarding examinations:
- Scantron forms and #2 pencils are required for all examinations. It is the responsibility of the student to mark answers clearly and to fully erase mis-marked answers. Scantron forms will not be rescored.
- Graded Scantron forms should be retained by students as proof they have taken a test.

**Letter Grades:**

**Class Schedule:**

(Date indicates: “The Week of Monday ...)

Apr 06 Mon
Orientation
Chapter 1: “The Earth’s Atmosphere”
Special Audiovisuals, Demonstrations or Class Assignments:
Coast Tele-Course Video Series: “The Origin of the Solar System”

Apr 13 Mon
Chapter 2: “Warming the Earth and the Atmosphere”
Special Audiovisuals, Demonstrations or Class Assignments:
Planetarium Demonstration: “The Seasons”

Apr 20 Mon
Chapter 3: “Air Temperature”
Special Audiovisuals, Demonstrations or Class Assignments:
NOVA Video: “What’s Up with the Weather?” (The Issue of Global Warming)

Apr 27 Mon
Chapter 4: “Humidity Condensation & Clouds”
Special Audiovisuals, Demonstrations or Class Assignments:
Earth Science Video Library: “The Hydrologic Cycle – Water in Motion”
Earth Science Video Library: "Reading the Clouds"
Review for Test 1
