

Student Feedback System

De Anza Associated Student Body
Ad Hoc Committee
01/29/2020

Concerns

1. **No accessibility to the internal department evaluations**
2. **The absence of regular student feedback system**
3. **Heavily dependent on public and unofficial resources**
4. **Demand from students (and faculty) for objective feedback of classes** (ex: [Campus feedback for De Anza College president search](#))

Goals

I. Why we need the system:

1. Prevent students' dependency on public and unofficial resources.
2. Protect students' right to a certain quality of education.
3. Establish regular means of checking in with professors.

II. How the system may help:

1. Assist students to choose the most suitable classes for their needs.
2. Act as incentive to maintain a certain quality of education.
3. Recognize underperforming professors and offer assistance.

System Reference: CAPE

UCSD Cape corresponds with the ideals of our system.

Students

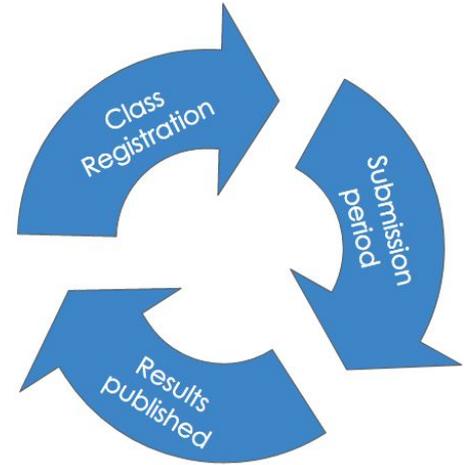

- Make informed choices about class registration.
- Give feedback on their classes/instructors.

Professors:

- An objective way to gauge how effective their teaching methods are.

School:

- A way to ensure that faculty are professional and responsible.

Funding the student feedback system

We do realize the budget allocations to fund this project may be limited.

Possible solutions:

1. Fund the project by going to the foundation or college planning committee.
2. Offer internship program for the project, the students could gain internship experience working with professionals.
