Name	Division	Department/Area	Status
Andrew Stoddard	Business, Computer Science and Applied Technologies Division	DMT	Full-time Tenured

	<p>I've worked for De Anza College for over 10 years as a classified and faculty member. Having the rare opportunity to work in both positions, I believe this has given me a well-rounded overview of the college as a whole and a vision from different perspectives of our multi-cultural community. With anyone who strives to advance themselves in education, it's through active participation in college service and committees that a person can really get involved and make a difference in the quality of a student's education. Growing up in a region with a large socio-economic and ethnic population, I learned at an early age to be respectful of all people no matter of their cultural and ideological back grounds. These experiences have helped me succeed with understanding the needs of our students. Diversity matters in all aspects of life. Understanding viewpoints from others with different experiences helps broaden the focus and vision for a better overall solution for equity that we all strive for. There are always new ways to grow as an educator as well as different ways to reach students. My ambition in life is to help our community better their lives through opportunities available at De Anza.</p>
