Social Contribution Activities

Supporting research activities through MTTRF

MTTRF (the Machine Tool Technologies Research Foundation) is a nonprofit organization certified by the U.S. Government. It operates through contributions from companies, with Mori Seiki as its main sponsor. At Mori Seiki, we carry out a range of activities through MTTRF, such as lending machine tools to universities and research institutions inside and outside Japan, and holding lectures at the annual general meetings.

Status of machine donation /lending from MTTRF to universities and research institutions

(as of March 31, 2011)

Donation / Lending Recipient (University / Research Institute)	Country
University of California, Berkeley	U.S.A.
University of California, Davis	
Massachusetts Institute of Technology	
University of Wisconsin System	
MTTRF—DRI	
University of British Columbia	Canada
Bremen Institute for Metrology, Automation and Quality Science (BIMAQ)	Germany
Katholieke Universiteit Leuven	Belgium
Swiss Federal Institute of Technology Zurich	Switzerland
Koç University	Turkey
University of Florence	Italy
National University of Singapore	Singapore
Kyoto University	Japan
MTTRF-KRI	
Osaka University	
Kobe University	
Kanazawa University	
Keio University	
Osaka Institute of Technology	
17 universities and 2 research institutes (DRI, KRI)	Total of 30 units

Supporting the WorldSkills Competition

Mori Seiki has been selected as an Official Supplier for the 41st WorldSkills Competition (WorldSkills London 2011), which will take place from October 5 to 8, 2011 in London, United Kingdom. Mori Seiki supports this biannual event for the third time in a row, following the 2007 competition in Shizuoka, Japan and the 2009 competition in Calgary, Canada.

For 2011, Mori Seiki provided 24 NLX2500MC/700 and NVX5100/40 machines from the X-class.

The WorldSkills competition, which started in 1950, is held once every two years with a view to improving technical skills, as well as promoting vocational training, international exchange and friendly relationships

among participating countries. Over 10,000 young engineers have competed in the WorldSkills Competition throughout its long history.
Mori Seiki will continue to provide highly reliable machine tools and support young technicians through machine tools.

Gold Sponsor

DMG / MORI SEIKI Scholarship Fund

In reaction to Great East Japan Earthquake, Mori Seiki accepted Gildemeister's proposal for human resource development to assist the recovery of Japanese manufacturing industry and the two companies have agreed with the Institute of National Colleges of Technology in Japan to establish the "DMG/MORI SEIKI Scholarship Fund" with the aim of providing support for education at national colleges of technology in the disaster-stricken region.

Cutting Dream Contest

Mori Seiki holds the "Cutting Dream Contest" every year for companies, universities, technical colleges, and research institutions, with the aim of improving and exchanging technology and techniques throughout the machining industry.

We should note that this contest has been held not only in Japan but also in the U.S.A. since 2006 and in Europe since 2007, where it has also won acclaim. Mori Seiki will continue to hold this contest to assist the development of cutting technologies and improvement of technical skills around the world.
