

For 2017-18 Submitted by: Kulwant Singh

APRU Complete for: 2017-18 ATHLETICS

Program Mission Statement: The Athletics Department is an integral part of the Physical Education Division. The department's mission is to provide an athletic program that helps develop the whole person (mind and body) through education and competition. Athletics contributes to discipline, integrity, leadership, life skills, social responsibility, sportsmanship, and teamwork. Athletics promotes ethnic and cultural diversity

The athletic program improves campus life, which is a foundation for student success. According to Dr. Myles Brand, former President of the NCAA and former President of Indiana University, "a student bond with the institution via clubs or sports contributes to academic success".

I.A.1 What is the Primary Focus of Your Program?: Transfer

I.A.2 Choose a Secondary Focus of Your Program?: N/A

I.B.1 Number Certificates of Achievement Awarded:

I.B.2 Number Certif of Achievement-Advanced Awarded:

I.B.3 #ADTs (Associate Degrees for Transfer) Awarded:

I.B.4 # AA and/or AS Degrees Awarded: 0

I.C.1. CTE Programs: Impact of External Trends:

I.C.2 CTE Programs: Advisory Board Input:

I.D.1 Academic Services & Learning Resources: #Faculty served:

I.D.2 Academic Services & Learning Resources: #Students served:

I.D.3 Academic Services & Learning Resources: #Staff Served:

I.E.1 Full time faculty (FTEF): 4.4

I.E.2 #Student Employees:

I.E.3 % Full-time : FT decreased by 1.1%, PT increased by 2.9%, FT has decreased 26% in five year cycle.

I.E.4 #Staff Employees: 3

I.E.5 Changes in Employees/Resources: Due to the Flint Garage renovation and issues related to the stadium artificial turf, Athletics have had three facilities temporarily out of commission for most of the past year. The baseball and soccer fields were being used for parking in 2016-17. The soccer field is back in use, the other two facilities are not. This has caused issues with scheduling and academic success (too much class time missed, due to too many away contests). This has hurt recruiting and enrollment

II.A Enrollment Trends: Athletics enrollments have decreased from 1445 to 1264 students in the last year. There have been two significant issues that have hurt Athletics Enrollment. 1) The removal of Athletics from a higher level of Priority Enrollment. De Anza Athletics was then at a competitive disadvantage against the neighboring community colleges as far as recruiting. Priority enrollment is a benefit that parents and potential student athletes expect to have since student athletes have to meet numerous National, State and Conference regulations that require student-athletes to be year-round in order to be and remain athletically and academically eligible. 2) Scheduling issues brought about by facility renovation delays during the 17-18 year. Several teams had to practice as early as 11:30pm due to scheduling or facilities availability. (Practices for the majority of the teams cannot be pushed back to later in the day to assist in accommodating more time for academics because we don't have sport lighting.) These factors have contributed to recruiting and retention issues for our programs.

II.B.1 Overall Success Rate: Athletics continues to have high Success at 93% for Targeted Groups and 94% for Non-Targeted populations. This has been consistent the past four years. In comparison, the college average for Targeted populations has been 70% and for Non-Targeted was 81%

II.B.2 Plan if Success Rate of Program is Below 60%: NA

II.C Changes Imposed by Internal/External Regulations: There are three organizations that imposing regulations upon the athletics programs that are currently affecting us in a more substantial way than ever: the Office for Civil Rights (OCR), California Community College Athletics Association (CCCAA) and the California State Legislature.

Title IX of the Educational Amendments became law in 1972. The California Community College Athletics Association is monitoring Title IX compliance. De Anza is in compliance of Title IX because of the Athletics Survey that is used in connection of CCCApply application process.

De Anza is in good standing as far as accommodating what OCR considers the underserved population (women) via the CCCApply Survey. De Anza is not in compliance with the law as far as facilities, team locker rooms, etc. There are a lack of team rooms for women's teams and the Softball facility for women is non-compliant relative to conference facility requirements as well as NCAA rules.

De Anza Athletics was a state leader in implementing an Athletics Title IX Survey as part of the application process thru CCCApply. De Anza was used a pilot program for the state in 2010. This is a supplemental survey to the CCCApply application process. This satisfies Test 3 of Title IX.

It is essential, in the era of periodic budget cuts, that De Anza College does not eliminate women's sports programs if the college wants to continue to use Test 3 to satisfy Title IX. Some colleges are being investigated due to the fact they use Test 3 but still dropped women's programs.

In the Fall of 2014, the athletics program was mandated to come into compliance with the new State regulation in Title V which limits apportionment for athletics i.e. 350 hours of apportionment per student athlete per sport per year. The department created new curriculum in response to these mandates.

There are new CCCAA State rules for teams regarding inputting statistics for contests. This is a requirement at times faculty simple don't have the time to take care of this additional responsibility. There are severe penalties for non-compliance including entire Athletic Departments being put on probation and/or suspension of coaches. A part time Sports Information would be a great addition to the staff to promote sports and would ensure compliance of the CCCAA rules

CHP regulations have been revised. Our buses require drivers with a Class B licenses, all drivers must have a physical exam every two years.

III.A Growth and Decline of Targeted Student Populations: The targeted groups in athletics remains at 59%.

The college's targeted population is 36%

III.B Closing the Student Equity Gap: Athletics is a model for student-success. The program review data sheet athletics indicates that there is -1% Student Equity Gap for the student-athlete population

In 2013 a report was conducted by the Institutional Research office. The results show overall that athletes perform better academically and that student athletes in targeted groups do fair better also. This in depth study shows that males and female athletes succeeded at an equal rate of 75% when the grades of intercollegiate classes were excluded. Males and female athletes succeeded at rates 72% compared to 73% for male non-athletes and 79% compared to 78% for non-athlete females when the grades of intercollegiate classes were excluded. When the data is dis-aggregated by one more step comparing student success of athletes to non-athletes within their "targeted/underserved" groupings and excluding intercollegiate athletic courses, african-american males and females were 3% more successful than their non-athletic peers; Latino and Latina were 1% and 0% more successful than their non-athletic peers

We have performed four pilot programs in our area to improve student success. We opened a student study hall with paid tutors in Math and English for all interested athletes two days a week from 1 to 5:30pm . Statistically, we found a high correlation between students whose coaches mandated attendance and increased success in math and English classes. We also discovered that many students participated in online tutoring and sought out help in the SSC independently. This was a surprising result

The second pilot we developed was a joint effort with the Counseling Division. Two counselors were assigned to our area during the Fall quarter of 2014. The additional counselors helped with Ed Plans and advising. This pilot was somewhat helpful for our athletes.

The third program FAST, Football Academic Success and Transfer cohort. It is now midway through its third year. This cohort was developed with the express purpose of assisting "targeted/underserved populations" African Americans, Pacific Islanders and Latino males. The first year of the pilot was funded by a DARE grant- Fall 2014-Spring 2015. 15-16, 16-17, 17-18 is funded by Faculty funds.

Statistical results can be found in the FAST Program Review Doc. A brief overview is summarized here.

Fall 2014-Spring 2015

Total Number of Participants: 29

Sophomores: 17

Freshmen: 12

Students that received AA and transferred to a 4 year 48%

Students that are still at De Anza 20%

Students that transferred to another Junior College 8%

Students that are no longer enrolled and location unknown 24%

Fall 2015-Spring 2016

Total Number of Participants: 29

Sophomores: 7

Freshmen: 22

Students that received AA and transferred to a 4 year 17%

Students that are enrolled at De Anza and with Football Team 44%

Students that are enrolled at De Anza but not with Football Team 10%

Students that transferred to another Junior College 13%

Students that left De Anza and location unknown 16%

Fall 2016-Winter 2017

Total Number of Participants: 30

Sophomores: 10

Freshmen: 20

Students that received AA and transferred to a 4 year 27%

Students that enrolled at De Anza with the Football Team 50%

Students that are enrolled at De Anza but not with Football Team 7%

Students that transferred to another Junior College 16%

Demographics

Ethnicity Number Percentage

Pacific Islander 9 31%

African American 11 38%

Caucasian 4 14%

Hispanic 5 17%

Totals 29 100%

Fall 2017-Winter 2018

Total Number of Participants: 37

Sophomores: 5 or 14%

Freshmen: 32 or 86%

Students that are returning to De Anza with the Football team: 78%

Students that are on track to receive their AA at the end of their sophomore year: 86%

Students that transferred to another Junior College: 8%

Students who quit football: .14%

Demographics

Ethnicity Number Percentage

Pacific Islander 6 16%

African American 19 51%

Caucasian	6	16%
Hispanic	5	14%
Asian	1	3%
Totals	29	100%

At the end of the spring 2016 Quarter the FAST student-athletes took a survey. Implementation of the suggestions from the student-athletes seems to have been extremely effective for the fall 2016 and winter 2017 quarters. A plan to run another survey in the spring 2017 quarter is being discussed. More technology always seems to be a question the students inquire about. They truly appreciate the opportunity to come into a classroom where they have access to laptops, Ipads and a printer to further help their success in their classes. The tutors we hired were helpful but due to scheduling issues they were not available on a more consistent basis. We were also limited in the types of courses the tutors were able to assist with. Unfortunately, the tutoring center does not have tutors who can come to the FAST sessions. But, during the Spring of 2016 many of the athletes were comfortable going to the tutorial centers on their own to work. They found the math center to be a bit too noisy, but they enjoyed the help. We have not had a chance to perform a survey for the Spring 2018 quarter yet. The most important and valuable addition to the program has been the new association with the Men of Color (MCC) program. We have moved the tutorial center to S73 right across from the MCC office. They started with us mid-Winter quarter. The students have responded very well to the counselors and staff. This addition has greatly helped the part-time football coach provide regular tutorial sessions. He has more time to provide administrative support for the students. There are two hired tutors and the MCC staff to assist. The athletes are even attending the MCC office during non-FAST hours. The coordinator sees the possibility of expanding the program to serve student athletes from other teams.

The equity-funded cohort, REACH-Reading, English, Athletics, Counseling and Humanities is continuing to enjoy positive results this year. The first pilot started W'2016. Basic Skills Reading and Basic Skills Writing yielded amazing results for a first year cohort. Lydia Hearn wrote: "This Winter we began the REACH program with 24 student-athletes taking a LART211 (READ/EWRT) class, the majority of whom come from underserved populations. We had a 100% retention rate with a 96% success rate. With the students' work evaluated through the English department portfolio process, we had affirmation from English department faculty external to the program that the students who passed the portfolio were writing and reading at a level to be ready for EWRT1A. These are amazing numbers not only for this special population but for ANY class! It was challenging, but by the end of the quarter, the students pulled through and began to see themselves as scholars in addition to being athletes. Some of them even commented in their portfolios that they enjoyed being in a class where they were not stereotyped as "dumb jocks" and were encouraged to see themselves as intelligent students. . . ." Spring quarter, 2016 was also a great success

The end of the year PLO survey yielded the following comments from the 23 students: over 80 percent of the students asked for the following curriculum content LART 211, HUMI 1, EWRT 1A, EWRT 1B, EWRT 2, SOC 1 and more options to take the courses at another time of day. They enjoyed the environment the instructors created and felt that they were helped in becoming a better student. 23/23 would recommend the program to other student athletes. The 15-16 cohort consisted of 15 males and 8 females. 18 targeted students and 5 non-targeted students. (A full survey results sheet can be requested).

Fall, 2016 we started a new (3 quarter) cohort group. We added a Women's Studies course for Winter Quarter and EWRT 2 to the sequence for the 16-17 year.

Fall, 2017 we started another 3 quarter cohort group. We now have Sociology 1 instead of Women's Studies for the Winter Quarter.

Lastly, a final update in our area. Our Counselor, Louise Madrigal continues to be an amazing addition. In addition to improving the number of opportunities for student athletes to receive personal advice and guidance from an academic counselor, she has and will develop workshops, develop and support student-athlete orientations and performed plans for Kinesiology majors and Massage Therapy students. She is embedded in the cohorts. She has attended class sessions, made routine reoccurring appointments with identified "at risk" student-athletes. She is integral in counseling our pacific-islander population. The young men especially respond to her guidance very well. She has also become a major asset for the Massage Therapy students. She is performing educational plans for them and most importantly helping to ensure that they apply for their

Coaches continue to report that having additional services provided has been helpful.

III.C Plan if Success Rate of Targeted Group(s) is Below 60%: NA

III.D Departmental Equity Planning and Progress: As mentioned above, the FAST and REACH cohort program surveys have shown measurable amounts of student success. Students "feel" better about their academics. We have a new Head Coach for the Football program. His coaching team's goal is to emphasize student success and retention. Since the program consists largely of targeted students, this new theme will build a new culture. All freshman are going to be required to attend the FAST program. We have asked other coaches to send their students to the FAST sessions too. We have obtained 10 wireless keyboards and hope that this will assist more students during their FAST meetings. However, we still have a disappointing record of student success in the classroom. These young men seem to be largely motivated to compete and come for a quarter then leave or fail in their course work. Examination of overall grades shows FAST grades are much stronger than those who do not attend. It will take time for the coaches to build a new culture. For the 16-17 year, as you can see from the FAST coordinator's report we have a stronger retention rate and more football students on track to complete their transfer requirements. This is largely due to the coordinator's efforts in working very closely with the Dean and Louise Madrigal to establish a link

The REACH program is a great success. We had large percentage of Football players attend again the Fall of 17.

IV.A Cycle 2 PLOAC Summary (since June 30, 2014): PLOAC surveys are complete. The Athletic Trainers and Counseling/Advising team will also be contributing.

IV.B Cycle 2 SLOAC Summary (since June 30, 2014): 100% have SLOs = 30 total, 100% of the SLO's have assessment methods. 77% of the SLOAC assessments have been completed.

V.A Budget Trends: B Budget funding commitment from the College for athletics has always been in flux. In the past, every year a large portion of the "B" Budget was received as an augmentation(s) just to pay the bills at the end of the year. Now due to FHDA district budget shortfalls there are no more augmentations available. We are looking forward to the possibility of moving towards "zero budgeting" instead of the augmentation process.

2013-14 was disastrous year. As a result of the recession funding for assistant coaches was removed in lieu of elimination of programs. The Men's tennis team is moving towards full funding through an endowment. And, the full-time Women's Waterpolo Coach voluntarily added the Men's Waterpolo team to her contract. Lastly, funding for the renovation of the Baseball field became a reality with the hiring of a new adjunct Head Baseball Coach

2014-15, the implementation of the Affordable Care Act by the District resulted in funding coaching assistants at an hourly rate. This has been a huge help to the teams and morale in the department.

The athletics productivity is still strong at 606.

V.B Funding Impact on Enrollment Trends: In 1967-68 De Anza started Athletics with 10 men's programs. In 2016-17 there are 9 men's programs and 10 women's programs. "B" Budget increases have not occurred over the years to properly support the women's programs.

V.C.1 Faculty Position(s) Needed: Replace due to vacancy

V.C.2 Justification for Faculty Position(s): There is a need for a full-time faculty Athletic Trainer. Based on the number of student athletes there is a need for more comprehensive medical support. A faculty member who could set up a certificate program in athletic training has potential for establishing a link with high school students. This program could provide students with an introduction to the vocation. This project has potential for being funded by strong work force.

There is a need for more full-time coaches for Athletics. It is important to have Full Time coaches vs Part Time coaches due to the job responsibilities of teaching, recruiting (outreach) and fundraising. Between 2000 to 2014, there was about a 40% increase in student athletes. These numbers highly correlate with the fact that we had full-time coach/instructors for all but 3 teams.

Additionally, coaches are drivers, advisors, and the college representative who is the primary liaison between students and De Anza. They spend many hours contacting university coaches and recruiters to help our student-athletes transfer.

These are the current positions held by adjunct faculty: W Badminton, Baseball, W. Basketball, Football, Softball. Men's & Women's Tennis. The ratio of underrepresented students compared to the total number of members on each team, within one sample year, are listed after the coaching position. These students require more one-one assistance and guidance from our coaches.

V.D.1 Staff Position(s) Needed: Growth position

V.D.2 Justification for Staff Position(s):: There is also a need for a full time Athletics Trainer. There are nineteen teams and about 450 student-athletes. National studies show that for number of athletes serviced there should be 5 FT athletic trainers to fully cover the needs of student - athletes in a program our size.

The CCCAA is requiring colleges input stats during or after contests. There are severe consequences for not reporting scores in a timely manner. A Sports Information Director (SID) would relieve coaches of this time sensitive task by sending individual scores and statistics to the CCCAA statisticians. A SID is also needed to assist with getting information out to the College and public, sending in game scores and statistics, creating feature stories, and helping us to cultivate a relationship with the public.

V.E.1 Equipment Requests: Over \$1,000

V.E.2 Equipment Title, Description, and Quantity:

Aquatics- Water Polo MW

All Sport 5000

Portable Shot Clocks

Team Benches

Water Polo Caps

Warm ups

Water Polo Balls - men

Water Polo balls -Women

Specialty Tape/Wrap/Padding/Foam
Emergency First Aid (Gloves, gauze, bandaids, antibacterial, dressings, etc)
Modalities (Ice bags, E-stim pads, U-Sound gel, toe covers, etc)
OTC medications (Ibuprofen, Acetaminophen, Cold medication, Antihistamins, Topical Pain Relief Creams, etc.)
Rehydration (Cups)
Durable Medical Equipment (Walking Boots/Shoes, Knee Braces, Shoulder slings, Crutches, Wrist/Ankle braces, Splints)
Therapeutic Exercise Equip (Physio Balls, Medicine Balls, Foam Rollers, Stretching Staps, Various Elastic Bands/Straps/Tubing, Hand
Therapy Equip, Balance Pads, TRX, Etc.)
Healthcare Hygiene and Cleaning Products
Replacement Travel Medical Kits
Replacement Water Coolers & Ice Chests

Volleyball
White Boards (Portable)
Volleyballs
Chairs

Transportation
Three 9-passenger vans are needed to help supplement team travel.
2 mini buses
Two 7-passenger

Instructional Technology
7 flat screen TV's (media refresh) with wi-fi capabilities and blu-ray with video machines for all team rooms, apple tv (for each of the seven team rooms)

2 - Digital Camera systems with movie capability

1 Athletics Projector

V.E.3 Equipment Justification: The students will use most of this equipment. Faculty and staff will use the video and technology equipment to provide visual feedback for students during practice and games and to assess game strategies. Software equipment is used by coaches to create videos of students as they compete and sent upon request to 4-year coaches as part of the recruiting and transfer process.

The Athletic Training Room Equipment is for safety or injury prevention and rehabilitation. Some of the equipment is broken or outdated. Our training room staff is able to save the District over \$50,000 in medical fees through assessment and treatment and rehabilitation programming related to athletic injuries (in conjunction with team physicians).

The current lottery allocation of \$23,600 was developed in 1999-2000. At that time it was not known that uniforms could be purchased with lottery money. Currently, the cost for uniforms is about \$20,000 because we have added at least 40 football players, 30 swim team members, over 50 track and field participants, and two teams: women's badminton and women's waterpolo. We have increased the number of student-athletes we serve from 280 athletes to 440 (about 40% growth).

V.F.1 Facility Request: Football and Track and Field.

- Sports Lighting
- New bleachers on each side of stadium
- Concession stand
- Ticket booth
- Satellite Athletic Training Room
- Garage parking for 2 John Deer Gators
- Replacement of hammer/discus cage area
- Additional permanent 4 Foot fencing to fully protect the track/turf area
- Repair/Replace turf field AND establish plan to replace turf every 7-10 years

Softball.

The softball field still needs to be completed to be in compliance with Title IX. The facility lacks a NCAA level backstop. This is in violation of the NCAA rules. CCCAA Softball uses the NCAA rulebook.

- Dugouts (new roofs, rubber flooring and windscreen)
- Batting Cage
- 8 Foot Perimeter fencing around facility
- Backstop padding
- Windscreening
- Artificial turf outfield

Baseball Field.

The baseball field has NOT received money from Measures E or C. List of needs:

- Artificial Turf
- batting cages
- new dugouts
- proper fencing
- Scoreboard
- Backstop and perimeter fence
- Flagpole
- Slats
- Spectator seating
- Foul pole (30 ft)

- water fountain
- shade structures (for spectators, teams and classes)

-PE21- Badminton, Volleyball, Men's and Women's Basketball.

There needs to be a plan to build a new modern gymnasium facility. The current gymnasium is inadequate for the needs for athletics, physical education and DASB. Plans should include an actual entrance/lobby area as well bleachers on both sides. Also team locker rooms, office spaces, classrooms, video rooms, and a proper conference room could be created within the building. A student-athlete resources room and tutoring center should be included. Neighbor schools Canada and San Jose City Colleges are building new gymnasiums. This could impact recruiting and enrollment

Current PE21 facility needs:

- Scoreboard
- New bleachers on both sides
- New backboard technology for basketball

Men's and Women's Soccer.

The current soccer facility needs to plan to replace:

- Plan to replace every 7- 10 years Artificial surface
- Scoreboard
- Netting for current facility between soccer and tennis courts

Additional improvements for the soccer facility:

- Sport lighting
- Extend safety netting parallel to tennis and baseball to netting at Kirsh
- 8 foot fencing all around
- Water fountain
- Permanent bleachers
- Permanent shade structures (for spectators, teams and classes)

Swimming and Diving. Men's and Women's Water Polo.

- Sport lighting
- Matching netting behind both goals
- Permanent Shade Covering in the stands

Men's and Women's Tennis.

The tennis facility will need to be resurfaced.

Team Rooms/Locker Rooms

There is a shortage of team rooms for the Women's sports. Some of the women's teams use team room in the men's team room area. This is a violation of Title IX. There is overcrowding in the women's team room area.

- TVs in team rooms
- Wi-fi in team rooms

The football team room is inadequate for the number of participants in the football program.

Outdoor Facilities

All outside fields and tennis courts need more shade and drinking fountains.

All outdoor facilities need to be fully fenced so they can be protected from overuse and vandalism. The Softball and Soccer fields are not enclosed.

Wi-fi is needed on all outdoor athletic fields/facilities.

Student-Athlete Academic Resources Center

A space is needed for the creation of an Academic Resources Center for Student-Athletes in or close to the athletics area. This could be a classroom. Tutoring, counseling and other services would be a part of the Academic Resources Center for Student-Athletes. If you build it they will come.

Video and Technology Area

The technology office would be used by coaches, assistant coaches and student-athletes. This would be used by numerous staff and students for statistical analysis and video. This would possibly help performance and help teams succeed. This may also help increase attaining scholarships

Conference Room and Classroom

There needs to be proper Physical Education and Athletics Conference room of adequate size for the Division.

There needs to be at least one more Physical Education/Athletics classroom for team meetings and lecture classes.

The De Anza College Facilities Master plan needs to include the Physical Education and Athletics areas in all aspects.

Sports Strengthening and Performance Center (working title)

-The current weight room is insufficient for 19 sports/450 athletes

-Need new building/space to include free weights, cardio equipment, open space for functional movement training, and incorporation of body weight/suspension training systems

Athletic Training Room

-Addition of TV to athletic training room

V.F.2 Facility Justification: These facilities are classroom used by student-athletes. Most of the facilities are unfinished or antiquated. A few years ago, the Senior Staff hired a consultant to review the state of the Athletics facilities. When finished the report was titled "Fund it. Finish it. Fix it" Facilities is one of the biggest issues for Athletics.

An Academic Resources Center for Student-Athletes space would be used by faculty, staff and student-athletes. classroom. It potentially would be used by the almost 500 student-athletes on different days at different times during the week. This would increase success towards transfer and/or degree completion.

The technology office would be used by coaches, assistant coaches and student-athletes. This would be used by numerous staff and students for statistical analysis and video. This would possibly help performance and help teams succeed. This may also help increase attaining scholarships.

Additional strength training center would provide a larger more functional, safe space for strength and functional movement development.

V.G Equity Planning and Support: Since we have moved to S73, the FAST program has been able to thrive with the MCC program and foodbank right across the hall. The students still indicate that they prefer laptops/computers, and sometimes they have to use the MCC computers.

We would also like to discuss the possibility of adding a permanent hourly position for the coordinator of the FAST program as continuing this program with the same coordinator would be best for the continuity and growth of the program. In addition supporting additional teams and tutorial support could occur in the future if a larger facility could be secured. We need help securing and supporting the peer tutors that we have. We have also been able to move FAST to 2:30pm since football starts very late. This has helped immensely with attendance. We are definitely hoping that other teams will be able to join the group in the future. This issue will be finding a time frame that does not interfere with practices

V.H.1 Other Needed Resources: Procards for fuel and towing were received by the District in March of 2017. This has been a great improvement towards safety for our coaches and their teams. We have already used them for emergency towing.

V.H.2 Other Needed Resources Justification:
