Nearly all of the tools you need in order to create documents and design flyers or newsletters can be found in the Ribbon, which is the strip of tools across the top of your document window.

Note: If you don't see your Ribbon, click on "Home" and it should appear. Any time you are using Word and click on the active tab in the Ribbon, the Ribbon will be hidden from view. You'll need to click on that tab again in order to make it reappear.

Themes and Styles

What are Themes?

Microsoft Word (and PowerPoint) has preset themes that give you a color palette with colors. **Themes can be accessed in the Home Tab of your Ribbon.**

What are Styles?

The heading for this paragraph is a style called "Heading 1." Instead of having to highlight *What are Styles*, make the text bold, change the size and change the color, I simply selected "Heading 1" from my Style pull-down menu. You probably see this menu all the time and not realize what it is. It's that little box up there in your formatting toolbar that says "Normal."

You can alter the styles in the menu with different fonts, font sizes and line spacing. You can make it so those styles are available every time you open Microsoft Word.

TRY THIS!

- 1. Open a New Document in Microsoft Word.
- 2. Type the sentence: "All About Styles!"
- 3. Highlight the sentence.
- 4. In the Home section of your Ribbon, click Heading 1

Note:

If you don't see your Ribbon, go to the View Pull-down Menu and select Ribbon

Great! Now How Can I Change What My Styles Look Like?

It's actually pretty simple!

If you Control + Click (Mac) or Right-click (PC) on the style in your Ribbon you want to modify, a menu will appear where you can select **Modify.**

AaBbCcDdI AaBbCcDdEe AaBbCcDdEe	Modify Style		
Headi Update to Match Selection	Properties		
Modify	Name:	Normal	
Select All 10 Instance(s)	Style type:	Paragraph \$	
	Style based on:	(no style) 🛟	
Rename	Style for following paragraph:	¶ Normal ‡	
Remove from Quick Style Gallery	Formatting		
This area is where you will modify your style. You can change the font, font size, color, etc. If you click "Add to template" you will be permanently changing your default elements for that style any time you open Word and start a new document.	Arial Narrow 12 Image: Imag	In Provide Pro	

TRY THIS!

Let's change the "Title" style in your default Word template.

- 1. Control + Click or Right Click on the "Title" style in your Ribbon
- 2. Select Modify.
- 3. Change the font to Arial Black.
- 4. Change the color to Dark Grey.
- 5. Make it center-aligned.
- 6. We don't want to make this change permanent right now, so DON'T click "Add to template."
- 7. Click OK.
- 8. Click Apply in the next window.

Now, every time you choose "Title" from the Style pull-down menu, it will have the elements you just created for this document only. You would need to **add it to the template** in order to make it permanent and universal for all of your documents.

Working with Pictures

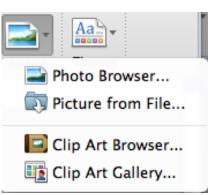

Adding pictures to your documents is a great feature that can add many design elements to your finished project, but you'll want to know how to work with those images, move them around and manipulate them.

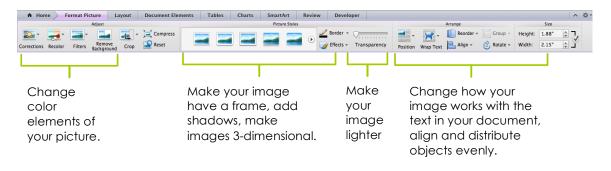

Inserting Pictures

You insert pictures from the **HOME** section of your **ribbon**. You can choose to insert a picture from Photo Browser (iPhoto), from file (somewhere else on your computer), or via the clip art gallery/browser.

Formatting Pictures

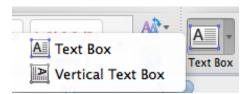

Once you've inserted and selected a picture in your document, a new tab appears on the Ribbon – **Format Picture.** All of the tools you need in order to make changes to your images are located in this section of the ribbon.

Text Boxes

Text boxes can be an excellent design tool to help with page layout. You insert text boxes from the **Home** section of your **ribbon**. You will need to draw the approximate size of the text box you want.

Formatting Text Boxes

Once you've inserted and selected a text box, a Format

tab will appear on your Ribbon. All of the tools you need in order to make changes to your images are located in this section of the ribbon.

A Home Format Layout Document Elements Tables	Charts SmartArt Review Developer	^ ¢
Shape Styles	Text Styles Text Box	Arrange Size
Abc Abc Abc Abc	A A ⊙ A Fill × A * Effects B * % Create Link	Position Wrap Text Align * C * Width: 0.5* *

Columns

Rather than using Text Boxes to format a page, you can choose to use columns. Columns give a more traditional, newsletter-type feel to your document.

If you want part of your document with columns, but not the whole thing, you will also need to use Section Breaks.

You can access Section Breaks by going to Insert \rightarrow Break \rightarrow Section Break, or by clicking Layout on your ribbon and clicking the arrow next to the **Break** icon.

Continuous Section Breaks allow you to stay on the same page, while Next Page Section Breaks will start you on a new page.

Let's Look at an Example of Columned and Non-Columned Sections on the Same Page

What we do

To provide appropriate opportunities for

meaningful personal and

Staff and Organizational Development

Who we are

The Office of Staff &

Program Outcomes Staff, faculty and administrators will appropriately utilize information, resources, and trainings provided in and by the Office of Staff and Organizational Development to help meet heir professiona levelopment needs New employee Orientation

Organizational Development serves a leadership role in promoting the professional development of all members of the De Anza College academic ommunity through the exchange of innovative ideas, individual expertise, and common interests.

- Conference and Travel Funds Professional Development
- professional development, the Staff Development Office supervises the processes for allocating staff development resources and coordinates a comprehensive program of individual and institutional professional growth, with responsibility for planning, promotion, dissemination of information, and program evaluation

There are two funds available for travel and conference administered by the Office of Staff and Organizational Develop ent and awarded by the De Anza College Staff levitalization and Professional Conference Funds Committee

Faculty Professional Conference and Travel Funds

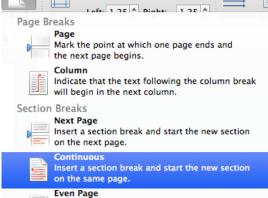

The Faculty Association (FA) and the District have negotiated \$75,600 in conference and travel funds for De Anza full-time and eligible part-time faculty for 2014-2015.

A.C.E. Classified Professionals Conference and Travel Funds

The Association of Classified Employees (ACE) and the District have negotiated \$25,000 in conference and travel funds for permanent De Anza full-time classified and classified hourly staff for 2014-2015.

Educational, Travel and Conference Funds for Teamsters

At this time there are no conference and travel funds available for supervisors or management staff through the Office of Staff and Organizational Development. Instructions and Applications may be obtained from this link:

Bottom: 1

+

AΞ

Top: 1

- Insert a section break and start the new section on the next even-numbered page.
 - Odd Page
- Insert a section break and start the new section
- on the next odd-numbered page.

In this document, I inserted a Continuous Section Break after the title on the page.

I created three columns.

At the end of the text in the third column, I inserted another Continuous Section Break and then went back to one column (or regular text) in order to type the remainder of the page.

Inserting Columns

You can insert columns by going to the Format pull-down menu and selecting Columns. Or you can select the arrow next to Columns in the Layout Area of your Ribbon.
