Course Description:

Topics include: Functions –linear, polynomial, rational, exponential, logarithmic– and their graphs; solving equations and applications associated with each of those functions.

Course Text: Pre-Calculus with Limits –3rd Ed., Larson;

A graphing calculator (TI-83/83+/84) is MANDATORY.

Author's tutorial help is available at www.larsonprecalculus.com

Student Learning Outcomes: (SLO's)

- 1. Investigate, evaluate, and differentiate between algebraic and transcendental functions in their graphic, formulaic, and tabular representations.
- 2. Synthesize, model, and communicate real–life applications and phenomena using algebraic and transcendental functions.

Pre-requisite: Math 114 with a C or better

*ATTENDANCE: Attendance is strongly emphasized. Since mathematics is cumulative in nature, attendance at all classes is expected. Students should be aware of appropriate drop dates. When you are absent, it is your responsibility to get the notes from other students who attend this same

class. <u>Your classmates are your great resource</u>. ***** <u>It is strongly suggested</u> that you get the names and email/phone numbers of *several* students in the class so that you may contact others for any missed assignments, should you be absent.

Note: . It is the student's complete responsibility to drop this class when the student cannot continue the course for any reasons. If a student is **absent more than two times** (unexcused absences) he/she will be dropped by me.

- * <u>Homework</u>: Homework assignments are given on each day of the class. They represent the student's opportunity to learn what was taught, by practicing both mechanical skills and problemsolving techniques. The student is expected to do –and is responsible for– all assigned problems associated with the section(s) of the text covered each class meeting.
- * The students are encouraged to ask questions from the HW, at the beginning of next class. Also, students can always meet me one-on-one, during my office hours, after your visit to tutoring.
- * Note: 1. Every student MUST bring 1) Text book; 2) A graphing calculator (TI-83/84/86) 3) Writing material; 4) Graph paper; PEN OR PENCIL every day to the class.
- * PLEASE Feel free to approach me about any of your problems at any time through email. I am email active, so will give u reply in 24 hours.

* **GRADING:** . It is a POINT system.

- c) A total of 2 quizzes are given and **no quiz score** is **dropped**, all are counted.
- d) And no quizzes are made up, if any student is absent for any quiz for any absence.
- e) The date of the quiz will be announced in advance..
- 2. MID-TERM TESTS (3): (3 TIMES 100 = 300 points)
- a) 3 Mid-terms are given in the quarter.
- **b)** The Mid-term test is given on a THURSDAY at the beginning of the class. Duration is 50 min-1 hour.
- c) If a student is late to the class, he/she must understand that No extra time is given for the TEST.
- d) TESTS are **NOT** made up if any student is absent for any Mid-term test for any reason, excused OR UNEXCUSED
- 3. <u>FINAL EXAM</u>: (100 points)There will be a comprehensive final exam on the last day we meet. A student *must* take the final exam to pass the course. Before going to the finals even if a student has a passing score, but if he/she does not attend the final exam, he/she will earn only F. So TAKING FINAL EXAM IS MANDATORY.

Optional points: (NOT MANDATORY)
