Course Description: Effective public speaking skills are essential for members of a democratic society. In this course, you will develop strategies for designing well-organized, researched, extemporaneous speeches on a variety of topics adapted to a diverse audience. The speeches and online discussions allow you to practice and critique your oral communication skills as well as observe and evaluate those of others. Readings, lectures, written assignments, and quizzes serve as resources for you as you develop your public speaking abilities and become more at ease when addressing an audience.

Course Objectives (CLO's)

The student will:

1. Examine historical and cultural traditions of oral communication in both domestic and global contexts and assess their impact on our views, beliefs, and practices relating to speaking in public.
2. Evaluate how making the decision to respect diversity, speak ethically, and think critically influences communication outcomes.
3. Select, locate, evaluate, and use information technologies and information sources.
4. Apply research, analyze, organize, compose, present, and evaluate informative and persuasive speeches.
5. Develop confidence in delivering speeches extemporaneously in front of a live audience.
6. Develop listening skills to foster respectful, reflective, and critical listening appropriate in public presentation.

Student Learning Outcomes (SLO's)

In addition to the course objectives, there are also specific Student Learning Outcomes (SLO's) associated with COMM 1. Specifically, by the end of this course, students will:

1. Organize, compose, present, and critically evaluate informative and persuasive presentations appropriate in content and style to the audience and situation.
2. Display increasing confidence in speaking extemporaneously.
3. Demonstrate effective listening skills in various public speaking contexts.
4. Identify, locate, evaluate and use information technologies and information sources.
